

Test Execution Summary – Swiggy Clone App

Project Details

- Application Under Test (AUT): Swiggy Clone App (Demo)
- Modules Covered: Login & Signup, Restaurant Search, Menu & Cart, Checkout & Payment, Order Tracking, Order History, Logout & Security, Notifications, Profile Management
- Test Type: Functional Testing (Manual)

Test Case Execution Status

Total Test Cases	Passed	Failed	Blocked	Not Executed
30	27	3	0	0

Failed Test Cases

- TC-05 (Signup): Signup form allows missing mandatory fields
- TC-13 (Cart): Quantity update not working correctly
- TC-20 (Payment): Invalid card details not handled

Defects Logged

Defect Id	Test Case Id	Severity	Priority	Status
BUG-01	TC-05	High	High	Open
BUG-02	TC-13	Medium	High	open
BUG-03	TC-20	Critical	High	open

Test Environment

- OS: Windows 10
- Browser/App: Chrome (v118) / Android App
- Test Data: Dummy user accounts, test restaurants, test payment cards

Conclusion

- Majority of test cases passed successfully (27/30).
- 3 critical bugs identified (Signup validation, Cart quantity, Payment error handling).

- Application is partially stable but requires fixes in Signup, Cart & Payment modules before production release.
